RILM Archive of Popular Music Magazines

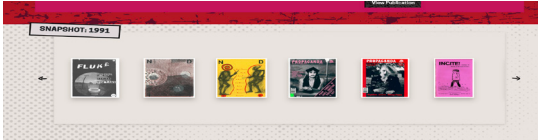

The Annually Expanding
Digital Collection
of Printed Zines

From DIY to Iconic: The Zines you Need

The RILM Archive of Popular Music Magazines (RAPMM) is an annually expanding digital collection of independently published popular music magazines and fanzines. It offers over 125 titles published from the late 1960s to the present. With the global rise in the popularity of zine creation, RAPMM features titles published in multiple regions and languages, as well as long and short publication runs. Each title—presented in full text, cover-to-cover—provides a first-hand account of local popular music scenes through articles, interviews, album and concert reviews, and record label histories.

RAPMM is carefully curated to represent a diverse range of writing tones, perspectives, design styles, and creative uses of publishing technologies to share popular music histories. The collection safeguards the do-it-yourself (DIY) practice of fanzine making while preserving the unique contents about popular culture, design, fashion, and politics.

Uncover the Stories Behind the Music

RAPMM is the gateway to a cultural complex of sounds, images, art forms, and cultural expressions, including:

- Documents and artwork tracing social movements within punk, feminism, and popular culture local scenes
- Histories of musical movements and their relation to politics and society
- Interviews with widely recognized and fairly unknown artists at different stages of their careers
- Popular music genres, including punk and other rock genres and subgenres, indie music, hip hop, world music, psychedelia, alternative music, jazz, and country music
- Band profiles
- Album reviews and charts
